Education

California State University, Northridge – BS in Computer Science

May 2023

Skills

Languages: Java, JavaScript, C#

Web Technologies: HTML, CSS, JQuery, Tailwind, SQLite

Tools: Git, Maven, Linux, Docker

Projects

TTRPG Writing Website

github.com/CalliopeCrescent/TroubleClub-Writer

- Created a website using **JavaScript**, **HTML5**, and **CSS** for writing character and story interactions for custom Discord chat bots utilized by writers
- Used **TailwindCSS** to quickly build and iterate over a clean website
- Created user interactivity with **JQuery** and **JQueryUI** to keep the website as lean as possible for quick and performant usability for writers
- Provides options to create, delete, or modify different character and story interactions and stores all information locally on the writer's browser

Full Stack eCommerce Website

github.com/CalliopeCrescent/comp380-commerce-website

- Led full-stack development for an **agile** team on an eCommerce platform to sell tangible goods
- Built a backend for frontend using **Spring Boot** to provide RESTful APIs via Tomcat and enhance search experience for customers
- Used Spring's internal **HikariCP JDBC** libraries to connect to an **AWS RDS MySQL** cloud database to securely store and performantly retrieve data
- Utilized **NuxtJS** with **SASS** to focus on server side rendering for performance and iterating over the frontend UI and UX quickly

Discord Music Bot

github.com/CalliopeCrescent/TroubleClub-Radio

- Designed and implemented a music playing bot for the popular chat service Discord using **Java**, used in multiple servers and used by over 20 users
- Serves audio from YouTube links, providing options to manipulate the audio stream for users to interact with
- Integrated features such as updating server configurations and creating user playlists, which are stored in an **SQLite** database
- Utilizes an open source bot library I designed for use on multiple projects which is maintained on **JDA (Java Discord API)** feature updates

Experience

Freelance Web Developer/Designer

2018 – Present

- Developed and maintained small HTML and JavaScript websites for multiple customers
- Drafted modern UX and UI for accessible and readable websites
- Created web-based tools for writers and world builders
